Reference: Easter Bunny Visit

We had a great morning as we started out at Frye Regional Hospital. We visited with a young lady that had her tonsils removed and was still having some complications from the surgery. She really enjoyed having the Easter Bunny visit her. We then visited with a young man that believed he was a little too big for the Easter Bunny but his mother didn't think so. He was a little embarrassed. We then made a swing by the birthing center prenatal care unit and visited with 2 parents with twins and 3 other newborns and let the staff take pictures with the Easter Bunny for their child's first visit from the Easter Bunny and that was exciting for them.

We left there and went to Catawba Valley Regional Hospital and went up to pediatrics where we found no children on the pediatric floor. So we made visits to several of the newborn rooms for the Easter Bunny's first visit to them.

We left Catawba Valley Regional Hospital and went to Catawba Valley Hospice House to visit the terminally ill patients and families. We visited with 11 patients and families there and they were so appreciative of us coming by and sharing the Easter Bunny with them. We had several very emotional patients and family members that could not express their appreciation but by weeping and hugging the Easter Bunny.

It was a great and rewarding day for Corporal Kanipe and me. We would like to thank you for making the Easter Bunny program available to us.

May God Bless!!!!
